

### **O2 Czech Republic has secured stable conditions for the development of 5G network and operation of the existing ones for coming years**

**September 8, 2021**

O2 Czech Republic (“the Company“) has concluded an amendment to the contract with CETIN a.s. for the operation and development of a physical mobile infrastructure. The company has hereby secured access to the infrastructure and functionalities of the Radio Access Network operated by the company CETIN up to 30 years from the date of signing the amendment. Furthermore, the Company has hereby established conditions for the development of a new 5G network, which was one of the commitments assumed in the auction of the 700 MHz frequencies.

#### **About O2 Czech Republic**

O2 is the largest operator on the Czech market. It provides voice, internet and data services to customers ranging from households to small and medium-sized businesses to large corporations. O2 always offers the latest technology. Currently, it is building the fifth-generation network (5G), which was the first to launch in the real world. O2 is also the largest internet provider for homes and businesses, covering 99% of addresses. Fixed connection works the best in combination with the O2 Smart Box modem, which has been developed in-house. With its O2 TV service, it is the largest provider of IPTV service in the Czech Republic. O2 has acquired a number of exclusive sports rights for its customers and thus offers the most attractive sports content on the Czech market. The company is one of the largest players in hosting and cloud services, as well as in managed services and ICT. As trends in the telecommunications sector are changing significantly, O2 also focuses on the development and offering of non-traditional telecommunications services. These include, in particular, financial services such as equipment insurance or mobile travel insurance.
